

GENERAL USE GLOVE WASHING GUIDE

Advisement:

Gloves are constructed from a wide variety of materials and manufacturing processes and require different methods of care when laundering. This general guide will provide some basic instructions on washing your gloves by base material.

If you choose to wash your own gloves you should be aware that there is no way to determine the effects or impact washing has on ratings, color, quality, performance or longevity of the materials and glove performance. Washing your personal protective equipment (PPE) gloves is not recommend; if possible use a professional glove cleaning service.

COTTON/WOOL

MACHINE WASH 30° **COLD** OR **HAND WASH**

HANG DRY Use mild or natural soaps or detergents

DO NOT

DO NOT BLEACH **DO NOT TUMBLE DRY**

DO NOT use harsh or scented detergents
